

# Creating the Prosthodontic Platform

## **No Fault, No Blame Dentistry! Learn what your other half needs.**

Don't ever again hear yourself say "My dentist (or lab tech) just doesn't understand me..."

Now, hopefully, your dentist/lab tech relationship is not your primary relationship, but, realistically, it hits somewhere near the top of your partnerships that can make your life easier or full of headaches. The dentist/lab tech partnership is crucial to quality dentistry, but, so often, each half ends up frustrated and ready to split due to easily fixable problems.

Bring your dentist/lab tech partner (or come by yourself) and we promise we won't do group hugs, but we will provide you with the tools to strengthen and enhance the working relationship between you and your dentist or your master lab technician.
